

Physical Therapy

OELI has its own, state of the art, Physical Therapy facility at the Rockville Centre location. It is run by Thomas G Lorenzo, LPT. Tom and his staff dedicate themselves to treating the patient using a holistic approach for both acute and long term orthopedic and neuromuscular conditions with the latest advancements and equipment in physical therapy through specialized treatment plans determined by an individual evaluation. Tom also specializes in "Pre-Hab therapy" whereby patients improve their motion and strengthen specific muscle groups prior to undergoing reconstructive surgery such as Total Hip or Total Knee Replacement. "Pre-Hab" encourages and can lead to both improved outcomes and a quicker recovery for most patients. OELI PT participates in many insurance plans.
